

TECHNICAL FASHION ATELIER / ТЕХНИЧЕСКО МОДНО АТЕЛИЕ

STIL KOREKT 2009

Pattern work, fit correction, sample development, cutting, restyling and small-series support for designers, brands, companies and private clients.

СТИЛ КОРЕКТ 2009 е техническо модно ателие за корекция, разработване и усъвършенстване на модни линии, облекла и дизайнерски модели.

What we do

We turn fashion ideas, samples and correction problems into precise, wearable and repeatable garments.

Какво правим

Превръщаме идеи, мостри и проблеми с фит или кройка в точни, носими и повторяеми модели.

CORE SERVICES

Technical services for fashion work.

Pattern making / Кройки

Construction and correction of base, designer and production patterns.

Grading / Градиране

Size range preparation with control over proportion, balance and key technical points.

Cutting / Разкрояване

Fabric placement, marking, grainline control, cutting and preparation of pieces.

Samples / Мостри

First samples, fittings, technical notes, corrections and repeat-ready versions.

Fit correction / Фит корекции

Silhouette, waist, sleeve, shoulder, length, lining, volume and complex designer details.

Small series / Малки серии

Limited production with consistency, finish control and delivery logic.

PROCESS AND STANDARDS

From idea to production-ready model.

01 Idea

Sketch, photo, garment, sample or problem assessment.

02 Pattern

Construction, correction or adaptation of the model base.

03 Cut

Material direction, placement, marking and clean cutting logic.

04 Construct

Sewing sequence, technical assembly and intermediate control.

05 Fit

Balance, movement, proportion, length and comfort check.

06 Perfect

Corrections, final finish, repeat notes and next steps.

Quality standard / Стандарт

The atelier checks the whole construction: pattern, material, silhouette, balance, size and finishing. The goal is not only to repair a visible issue, but to make the garment technically coherent.

Ателието проверява цялата конструкция: кройка, материя, силует, баланс, размер и завършек. Целта не е само видимата корекция, а технически издържан модел.
